

General Testing Information	
Client Name	Piramal Swasthya Management and Research Institute
Scope Name	"Sakhi" Mobile Application version 7.1.35 (Android Build)
Testing Scope / URL	Android Application
Security Audit Dates	04 <sup>th</sup> April 2024 – 07 <sup>th</sup> May 2024

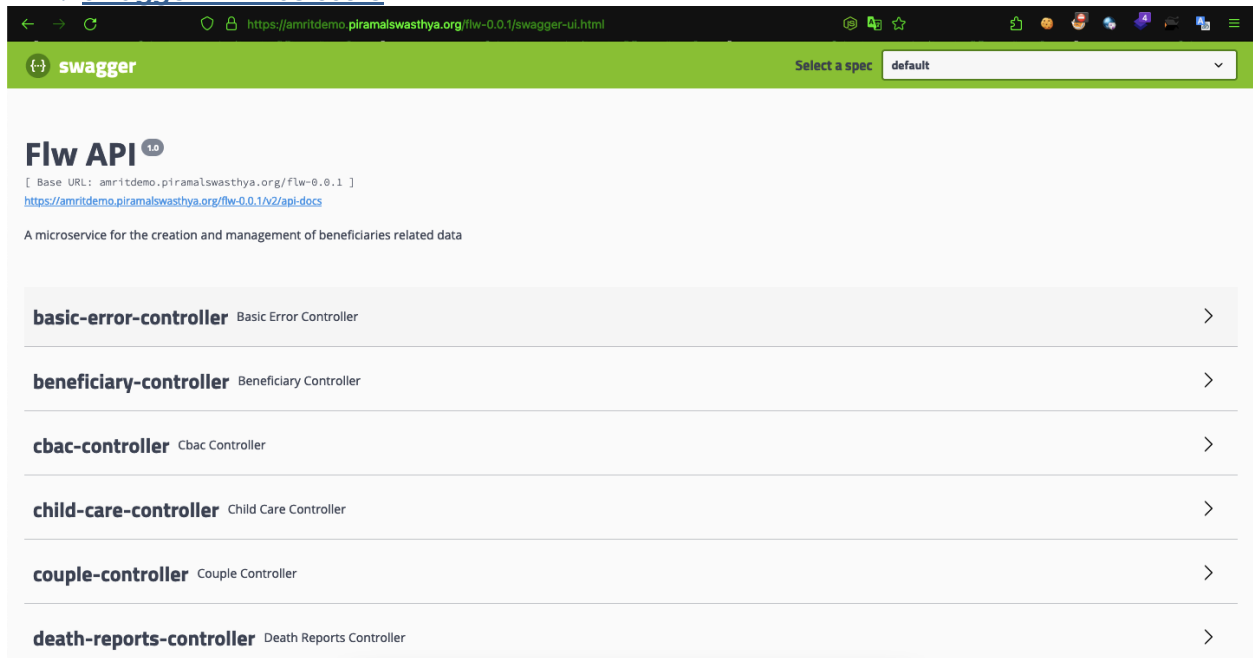

### **Vulnerabilities Name**

1. [Swagger API Disclosure](#)
2. [Improper Session Management](#)
3. [Sensitive User Information available inside Unencrypted Shared Preferences](#)
4. [Extraneous Functionality](#)
5. [Improper Platform Usage](#)
  - I. [Debuggable](#)
  - II. [ClearText Traffic](#)
6. [Sensitive Information Data](#)
7. [Task Switching](#)
8. [CORS](#)
9. [Copy Paste Buffer](#)
10. [Lack of code obfuscation](#)
11. [APP runs on Rooted Device](#)

## Proof of Concepts (POC)

Please check vulnerability tracker as shared for reproduction step

### 1. Swagger API Disclosure

**Flw API** <sup>0.0.1</sup>

[ Base URL: amritdemo.piramalswasthya.org/flw-0.0.1 ]  
<https://amritdemo.piramalswasthya.org/flw-0.0.1/v2/api-docs>

A microservice for the creation and management of beneficiaries related data

<b>basic-error-controller</b>	Basic Error Controller	>
<b>beneficiary-controller</b>	Beneficiary Controller	>
<b>cbac-controller</b>	Cbac Controller	>
<b>child-care-controller</b>	Child Care Controller	>
<b>couple-controller</b>	Couple Controller	>
<b>death-reports-controller</b>	Death Reports Controller	>

## 2. Improper Session Management

The image displays a Burp Suite interface on the left and a mobile application on the right. The Burp Suite interface shows a request and response for a POST request to `https://amritdemo.piramalswasthya.org`. The request is a POST request to `/identity-0.0.1/ranch/syncDataToAmrit` with a JSON body containing user details. The response is a 200 OK status with a JSON body indicating success.

The mobile application on the right shows a "Family Member Registration" screen. It includes a "Photo" section with a camera icon, a "Date of Registration" field set to "07-05-2024", a "First Name" field set to "TDG", a "Last Name / Surname" field set to "YG", an "Age" field set to "21 Years", a "Date of Birth" field set to "07-05-2003", a "Gender" field set to "Male", and a "Marital Status" field set to "Unmarried".

Below the registration screen, the mobile application shows a "Login" screen. It includes a "Please Select Your language" section with radio buttons for "English", "हिंदी", and "অসমীয়া". The "English" option is selected. Below this are fields for "Username" and "Password", a "Remember me" checkbox, and a "Login" button. The screen is powered by "Piramal Foundation".

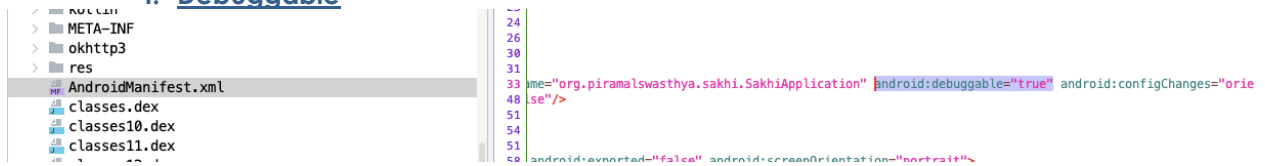

```

## 5. Improper Platform Usage

### I. Debuggable

### II. ClearTextTraffic

## 6. Sensitive Information Data

The screenshot displays the Burp Suite interface with a target URL of `https://amritdemo.piramalswasthya.org`. The 'Request' tab shows a POST request to `/commonapi-v1.0/user/userAuthenticate/` with a JSON body containing user credentials and a 'doLogout' flag. The 'Response' tab shows a JSON response with detailed user and service information.

**Request:**

```
1 POST /commonapi-v1.0/user/userAuthenticate/ HTTP/2
2 Host: amritdemo.piramalswasthya.org
3 No-Auth: true
4 Content-Type: application/json; charset=UTF-8
5 Content-Length: 188
6 Accept-Encoding: gzip, deflate, br
7 User-Agent: okhttp/4.10.0
8
9 {
  "userName": "8888888881",
  "password":
    "0a3d6dffa88380853f9efa065e7c27cc1e2a76185147230d6bd9a5461ed8a3fb0a6382eb194e7527d300859e43b
    1c0fd0b3f9b13532mcBSZAgHw==",
  "authKey": "",
  "doLogout": true
}
```

**Response:**

```
{
  "serviceID": 11,
  "serviceName": "FLW",
  "deleted": false,
  "createdDate": "2023-10-10T09:46:32.000Z",
  "createdBy": "Super Admin",

}
```

## 7. Task Switching

## 8. CORS

The screenshot shows Burp Suite's HTTP history and response details. The request is a POST to /api-v1.0/registrars/registrBeneficiaryRegistrationNew. The response is a 200 OK with the following headers:

- X-XSS-Protection: 1; mode=block
- X-Frame-Options: SAMEORIGIN
- Content-Type: text/plain; charset=UTF-8
- Content-Length: 154
- Date: Mon, 06 May 2024 11:29:14 GMT

The response body is a JSON object:

```
{
  "data": {
    "response": "Beneficiary successfully registered. Beneficiary ID is : 23095938956",
    "statusCode": 200,
    "errorMessage": "Success",
    "status": "Success"
  }
}
```

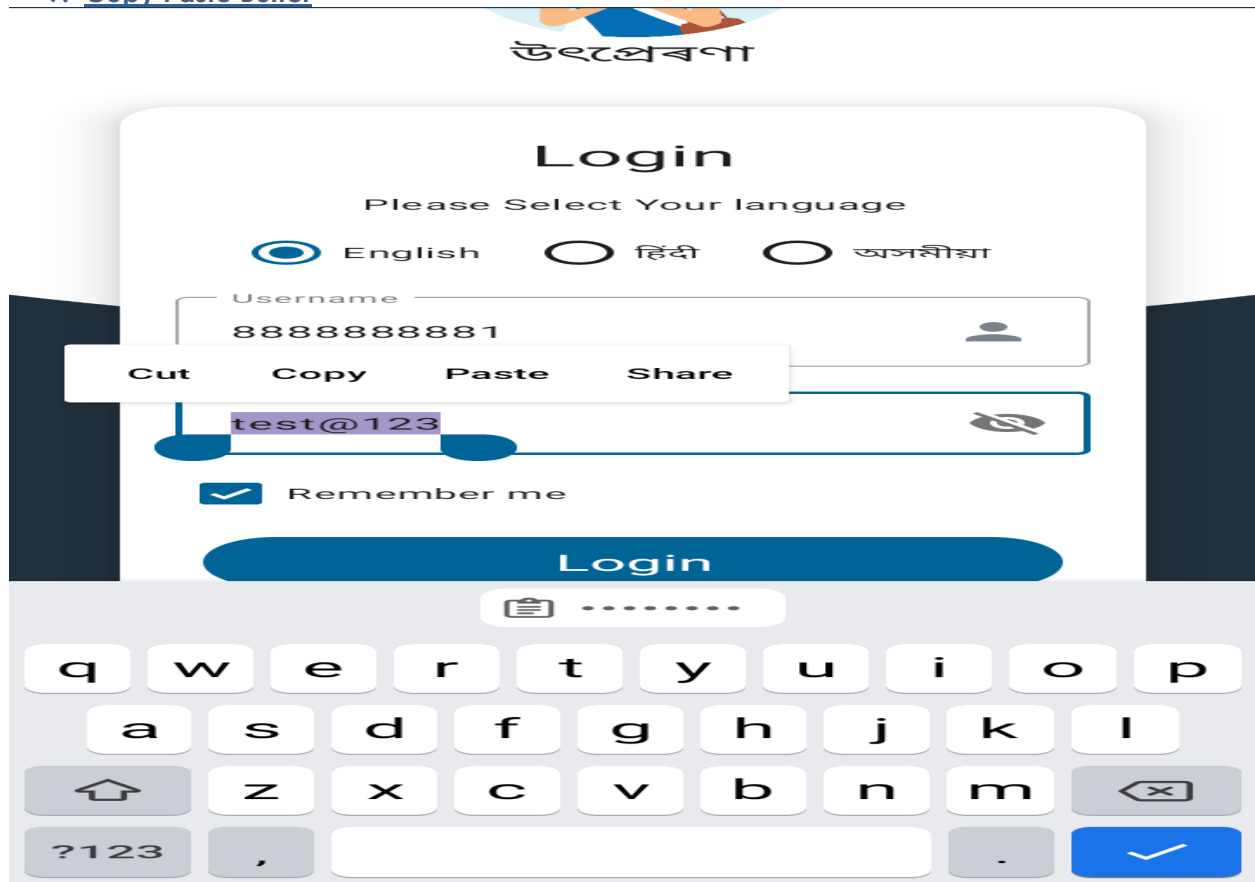

The screenshot shows Burp Suite's HTTP history and response details. The request is a POST to /api-v1.0/registrars/registrBeneficiaryRegistrationNew. The response is a 200 OK with the following headers:

- X-XSS-Protection: 1; mode=block
- X-Frame-Options: SAMEORIGIN
- Date: Mon, 06 May 2024 11:33:09 GMT
- Access-Control-Allow-Origin: bing.com
- Vary: Origin
- Access-Control-Allow-Credentials: true
- Content-Type: text/plain; charset=UTF-8
- Content-Length: 154

The response body is a JSON object:

```
{
  "data": {
    "response": "Beneficiary successfully registered. Beneficiary ID is : 584080034939",
    "statusCode": 200,
    "errorMessage": "Success",
    "status": "Success"
  }
}
```

## 9. Copy Paste Buffer

## 10. Lack of code obfuscation
